

SOIL CONDITIONER

PRODUCT FEATURES

- For 2.5 - 8 ton machines
- Motor rated at max 20 gpm and 3000 psi
- Angular adjustable mount
- Reversible wheel arms for stable height adjustment
- Solid wheels – Never go flat
- Machine specific coupler and hoses included

Our Mini Excavator Soil Conditioner is a powerful, and versatile attachment to add to your arsenal. This conditioner makes quick work of a wide variety of projects such as prepping seedbeds, cutting grades, grading dirt or gravel roads, and cleanup/finish grading, especially when working on sloped grades where a skid steer would lose traction. The octagonal mount plate allows you to work with the conditioner perpendicular to your tracks, at a 45-degree angle, or parallel to your tracks in a sweeping motion. Pair this unit with our 12" spade bucket and do utility installs with one machine from dig, to backfill, to seed prep.
