

SPADE BUCKET

PRODUCT FEATURES

9" SPADE BUCKET:

- Specially designed for foundation footers
- For 1 - 5 ton machines
- 36" Digging depth - exact size needed for footers
- Straight bucket design creates perfect right angles
- Sold with x2 removable digging teeth

12" SPADE BUCKET:

- Designed for greater capacity
- For 3.5 - 5 ton machines
- 48" Digging depth - larger than standard trenching buckets!
- Flat bottom and tapered side designed for easy clean-out so you can get more material per cycle
- Sold with x2 removable digging teeth

The Mongo Spade Buckets out-dig all standard trenching buckets, PERIOD. With the flat bottom design, and side walls designed for capacity and easy clean-out, these buckets make any trenching job easier. Our buckets allow you to dig with precision right up to a building or foundation, and can even get around existing utility lines in the ground. Available in two different styles.
