

SCREENING BUCKETS

The Mongo Attachments Screening Bucket allows operators to precisely screen and separate natural materials on-site. This attachment is applicable across multiple industries such as construction, road work, soil and aggregate segregation, recycling, agriculture, and more. Where there is a need to separate material fractions or fragment and mix several materials, our screening bucket is here for you!

Achieve precise screening capabilities thanks to the use of spacer rings. Quickly modify your bucket without disassembling the shafts.

Spacer rings are available in 3 sizes:

White - 30mm / 1.18"

Black - 20mm / 0.79"

Red - 10mm / 0.39"

PRODUCT SPECIFICATIONS

Model	Compatible Machine Size	Size	Bucket Weight	Hydraulic Requirements	Struck Capacity	Number of Shafts
MSB1	1 - 2 T	31"	573 lbs	7.9 - 10.6 gpm	4.6 CF	2
MSB3	3 - 5 T	35"	683.5 lbs	10.6 - 11.9 gpm	7 CF	3
MSB6	6 - 9 T	43"	1,080.5 lbs	13.2 - 15.9 gpm	13.4 CF	4

- Reinforced design doesn't lose its geometry even while operating under heavy loads
- Inner covers made of abrasion resistant steel protect the drive system and prevent damage for long life
- Quick-exchange system allows for gears and shafts to be easily serviced or replaced
- Customer can specify any top mount to fit their machine
